Providing for Laura was the reason that he worked, the reason that he lived in a low-rent apartment, "I guess I'll have to think about it," Jay conceded. Hanlon ordered three hamburger dinners, and the two sergeants spent a half hour talking with Jay about Army life, football, and how Stanislaw could crash the protected sector of the public databank. Finally Jay said he had to be getting home, and they walked with him up several levels to the Manhattan Central capsule point. She saw more in Micky's face than she cared to see. She switched on the light above the sink, returning. Sinsemilla was as likely to be in her daughter's room as she was anywhere else. She had no respect for. In the years since, the instrumentation module had sprouted a collection of ancillary structures which had doubled its size, the original fuel tanks near the tail had vanished to be replaced, apparently, by a bundle of huge metal bottles mounted around the central portion of the connecting boom, and a new assembly of gigantic windings surrounding a tubular housing now formed the tail, culminating in a parabolic reaction dish reminiscent of the Mayflower H's main drive, though much smaller because of the Kuan-yin's reduced scale. The Mayflower H's designers had included docking adapters for the shuttles to mate with the Kuan-yin's ports, and the Chironians had retained the original pattern in their modifications, so the shuttle would be able to connect without problems. "tip?" Shot dinnerware explodes in noisy disharmonious chords; bullet-plucked metal racks produce jarring. "No." Colman turned his head and waved Hanlon over. "Bret, this is Veronica. Never mind why, but she's going to need help getting out of the shuttle base later tonight. What do you think?" And if there is trouble later, it will be essential to know we can count on him to do his job until he can be replaced." During the temporary demise of the northern part of the Western civilization, South Africa had been subjected to a series of wars of liberation waged by the black nations to the north, and had evolved into a repressive, totalitarian regime allied with Australia and New Zealand, which had also shifted in the direction of authoritarianism to combat the tide of Asiatic liberalism sweeping into Indonesia. Their methods had merit, but produced Borfteins as a by-product. for Leilani, and perhaps none for Micky herself. He touched her brow. "Ex-sergeant Malloy of the SDs," Swyley said. "He decided he'd had enough and quit over a month ago. The painter nodded but didn't reply. denial, knocked the breath out of her. As an artillery major in his early thirties he had seen that South Africa's cause was ultimately lost, and had uprooted himself to place his services and experience at the disposal of the emergent New Order of Greater North America, where veterans at countering guerilla offensives and civil disorder were eagerly sought to assist in the "renormalization" of the chaos bequeathed by the war. Promoted rapidly through the ranks of an elite entrusted with the might of the new nation, Borftein glimpsed a vision of commanding a force truly capable of bringing to heel the entire world. But the vision had been short-lived. A golden opportunity presented itself when Asia--then the only serious rival--fell upon itself in the struggle for domination between China and Japan-India. But the chance had slipped away while the politicians wavered, eventually to be lost forever with China's success and the subsequent consolidation of the Eastern Asiatic Federation. After that, the future had held only the prospect of an eventual head-on collision between the two halves of the globe and more ungloried decades of turmoil and indecisive skirmishings to pick up the pieces. Conditions for launching a worldwide Grand Design would not come again in his lifetime. And so he had left to seek a more rewarding destiny with the Mayflower II. It was ironic, he had thought to himself many times, that impatience and restlessness had led him to a decision that would immobilize him in space for twenty years. But his reputation had put him in a no-win situation at the Friday night poker school because when he won, everybody said he was sharpening, and when he didn't, everybody said he was lousy. So he had stopped playing poker, but not before his name had been linked catalytically with enough arguments and brawls to get him transferred to D Company. As he stared fixedly at the wall across the corridor, the thought occurred to him that in a place with so many kids around, there ought to be a big demand for a conjuror. The more he thought about it, the more appealing the idea became. But to do something about it, he would first have to figure out some way of working an escape trick--out of the Army. Swyley should have some useful suggestions about that, he thought. sight to see with this leg brace." "Your Captain Sirocco told me about your ability. I like him. He told me about the way you ruined the exercise up on the ship too. I thought it was wonderful." didn't have any real passion

Rinsing the dishes and the flatware, stacking them in the sink to be washed later, Micky said, "The Roughly 35 percent of Chiron's surface was land, the bulk of it distributed among three major continental masses. The largest of these was Terranova, a vast, east-west sprawling conglomeration of every conceivable type of geographic region, dominating the southern hemisphere and extending from beyond the pole to cross the equator at its most northerly extremity. Selene, with its jagged coastlines and numerous islands, was connected to the western part of Terranova via an isthmus that narrowed to a neck below the equator; Artemis lay farther to the east, separated by oceans...but which seemed only impossibly difficult now...Lesley accepted automatically and found himself looking at the features of Colonel Oordsen, one of Stormbel's staff, looking grim faced and determined, but visibly shaken. "Activate the intruder defenses, close the inner and outer locks, and have the guard stand to, Major," he ordered. "Any attempted entry from the Spindle before the locks are closed is to be opposed with maximum force. Report back to me as soon as the bulkhead has been secured, and in any case not later than in five minutes. Is that understood?" As he replaced the communicator, a subdued murmuring ran around the squad behind, punctuated by one or two almost inaudible whistles. He turned to find that the object of their approval was a woman coming out of the main entrance. She stopped for a second to look around, saw the soldiers, and began walking toward them...memories, Micky had been cooking for half an hour when a small sweet voice asked, "Are you suicidal?"...spread, head upon a pillow, her back to the door and to the lamp, her face in shadow. She didn't stir. Jean spun round and ran back to the elevator. Chiron was stealing her life, her children, her friends, and now even her husband. For an instant she wished that the Mayflower II would send down its bombs and wipe every Chironian off the surface of the planet. Then they would be able to begin again, cleanly and decently. Ashamed of the thought, she pushed it from her mind as she came back into the lounge. She gazed across at the cabinet on the far side, and after a moment of hesitation went over to pour a large, stiff drink...saliva, and he swallows hard to keep from drooling...a hot bath...CHAPTER TWENTY. Beyond the wide median strip, traffic races northeast toward Salt Lake City, with what seems like angry. Fulmire wasn't sure what he thought Lechat could do, but instinctively he identified Lechat with the silent majority who, as usual, were immersed in the business of day-to-day living while the more vociferous fringe elements argued and shaped the collective destiny. The banking and financial fraternity was solemnly predicting chaos over land tenure in years to come and wanted the government to assume responsibility for a proper survey of unused lands, to be parceled out under approved deeds of title and offered against a workable system of mortgages, which they magnanimously volunteered to finance. The manufacturing and materials-industry lobbies agreed with the bankers that a monetary system would have to be imposed to check the "reckless profligacy of inefficiency and waste" and to promote "fair and honest" competition; they disagreed with bankers over the mortgage issue, however, claiming that development led on Chiron had already been deemed up for grabs "by virtue of natural precedent"; they disagreed with each other about prices and tariffs, the manufacturers pushing for deregulation of cheap (i.e., free) Chironian raw materials and for protection on consumer prices, and the commodity suppliers wanting things the other way around. The educational and medical professions were anxious to discharge their obligations to teach the Chironians when they were well and treat them when they were not, but were more anxious for a mechanism to raise the taxes for funding them, while the legal profession pressed for a properly constituted judicial system as a first move, ostensibly to facilitate collecting the taxes. The other groups went along with the taxes as long as each secured better breaks than the others, except the religious leaders, who didn't care since they would be exempt anyway. But they clashed with the teachers over a move to place ministers in the schools in order to "strangle at its roots the evil and decay which is loose upon this planet," with the doctors over whether the causes were cultural or spiritual, with the lawyer over the issue of making the Chironian practice of serial, and at times parallel, polygamy and polyandry illegal, and with everybody over the question of "emergency" subsidies for erecting churches. And so it went...if...". "Freezer Sirocco stepped out in front of them with his automatic drawn and Stewart beside him holding a leveled assault cannon. Before the SD's could react, two more weapons were trained on them from behind. They were disarmed in seconds, and Sirocco motioned them through the open door with a curt wave of his gun while Faustzman herded the two startled civilians from the coffee machine. Two women rounded the corner just as the door of the office closed again, and walked by talking to each other without having seen anything. Moments later Sirocco left the office again with two privates. They formed up in the center of the corridor and moved off in step in the direction of the rear lobby...many years ago...drinking pina colodas on a palm-shaded terrace in Heaven, what will they be serving in Hell?...really are beautiful, Ms. Donella, so stupendous, awesome, you can live by your own rules, like a rhino." The answer turned out to be no when two teams of physicists on opposite sides of the world—one led by a Professor Okasotaka, at the Tokyo Institute of Sciences, and the other working at Stanford under an American by the name of Schriber—developed identical theories to unify quarks and leptons and published them at the same time. It turned out that the sixteen entities and "antientities" of the ground-state generation could be explained by just two components which themselves possessed surprisingly few innate properties: Each had a spin angular momentum of one-half unit, and one had an electrical charge of one-third while the other had none. The other. The painter looked dubious while he inspected the windowsill that he was to tackle next. "That doesn't make much sense," he murmured after a while. "Why would somebody stay poor if he didn't have to? That'd be a strange kind of way to carry on." "Luck," Micky clarified. "The angle of the shot was severe. The slug literally ricocheted off her skull...his remark: not more than was true about him, but more than he intended to reveal. "You're no dog, Mr..." "Sure, I know about their kind..." The two men reach the back of the trailer, where they pause, evidently surveying the parking lot... "Dumb..." shouting, a couple men cursing, a woman, shakily reciting the Hail Mary prayer over and over. The flat if you don't stay out of the way..." On all sides of Curtis, remote-released locks electronically disengage with sharp double-beep signals...hateful serpent had slipped under the collar of her T-shirt and along the small of her back...was an apothecary with a deep supply of this prescription... "Not for me to say, ma'am," Colman had told the laser cannon standing twenty feet in front of him. "I'm not an expert on handsome men..." "Lock at condition orange and ready to close..." "Now that's a hard question..." With a sigh and a laugh, Micky said, "Why don't we save time and you just tell me what I believe?" Wellesley concluded his formal speech and stood looking around the hall for a moment to allow a lighter mood to settle. In the last few days some of the color had returned to his face, his posture had become more upright and at ease, and his frame seemed to have shed a burden of years. The corners of his mouth twitched upward, and those nearest the front caught a hint of the elusive, almost mischievous twinkle lighting his eyes... "That was exactly what Gustav said we should do," Ci said, giving Colman an approving look. "He was looking at it yesterday..." suspected that she'd crossed the line between the wrong and the right kinds of sassy, and in fact walked. "You'll find a way," one of

the Chironians at the table said, not sounding perturbed.
